## MEDICAL TRAINING FOR CATTLE

Training to improve efficiency and safety in cattle care

Upon request

2 days

Upon request

### Objectives

- \* Get to know your cattle better to improve safety and facilitate handling and interventions
- \* Develop a good human-animal relationship
- \* Identify common handling practices that cause stress in cattle, and take them into account
- \* Understand the mechanisms of learning and know how to use them in animal production
- \* Learn to break down the steps required for daily care, adapting to the cattle and its environment.

### Target audience

Breeders, technicians, engineers, veterinarians, scientists

### Referent

Pr Alice de Boyer des Roches (VetAgro-Sup)
